

PREDATOR VS PREY

We discovered a fun new game to play at the forest called Predator Vs. Prey, a game of survival. The game is a combination of hide and seek, tag and geocaching...needless to say the students loved it and learned about food chains and ecosystems. Thanks to all the chaperones that helped make this game a success! We couldn't have done it without you!

WINTER IS A GREAT TIME TO GO OUTSIDE AND EXPLORE!

Though some days we might like to hibernate, winter is a great time to explore outdoors!! Why, you might ask...here are some reasons to head out and explore this winter:

1. Finding tracks in the snow
2. When it gets dark earlier, it is easy to check out the night sky BEFORE bedtime.
3. OWLS-December is a great time hear Great Horned Owls.
4. SNOW-whether sledding, snowshoeing, skiing, or just enjoying the beautiful stillness of a fresh snow!
5. The heat of a campfire!

As you head outdoors, be ready for a ton of questions ...but don't worry...you don't have to be an expert on ANYTHING! Just encourage your child's sense of wonder by reflecting on these ideas:

I notice...

I wonder...

It reminds me of...

We use these same questions to build curiosity when we do our nature journals on Explorer Days.

Migration activity demonstrates challenges birds that rely on wetlands face along their migration.

The Spiral Walk is a Waldorf education tradition to encourage kindness.

Predator Vs. Prey, a game of survival was a big hit as students tried to gather resources and avoid being "eaten" by a predator.

Exploring camouflage adaptations

Owl and Mouse game focuses on the sense of hearing.
