

*no two children are alike.*

If no two children are alike, then why should they have the exact same educational solutions? We believe your child's education should be as unique as they are. They all can't fit in the same box and they shouldn't.

At the RVA, we strive to provide families the resources they need to establish a strong academic foundation, the flexibility to learn on their own schedule and at their own pace, teachers that both engage and inspire, and specialty classes that your typical brick and mortar school can't provide. The best part is that this customized education is FREE for families who want to take advantage of this amazing opportunity.

So if you're interested in a well-rounded education for kids who are going places, read on...

**At the RVA, we don't just educate, we foster deep relationships by hosting over 100 FREE events held throughout the state of Wisconsin each year!**

The RVA organizes group events, at no cost to our families, that encourage both students and their families to join together to share interests, have fun, discover new talents, learn, and make new friends and connections. We like to say that RVA actually stands for "Relationships. Values. Academics." in that order, no apologies.

Check out our facebook page to see all the awesome ways our students connect and learn!

**limitless future.**

## Every Child is at the Center of Their Own Education

### A New Approach

We all shuffled onto the yellow limo as children, our parents waved to us from the curb, hoping we would thrive, or at least not fail, in the one-size-fits-all system that the brick and mortar school provided. But now as parents, **you have the ability to choose what's best for your child** through a fully customizable and flexible educational program centered around your child with the help of Rural Virtual Academy (RVA). We put you in the driver's seat and give you all the tools you need, delivering a curriculum based on your child's abilities and gifts. You won't do it alone though. You will have the RVA and a host of dedicated educators and innovative online resources to help you along the way.

### Flexibility for Family

RVA is a great fit for those who want to spend more quality time with their family. If the grandparents come to visit in the fall, you have the flexibility to take a week off. That's not to say you don't have to work hard, but sometimes you can do extra work in advance so you can free up the time your family needs in the future.

**Tuition is FREE and we even reimburse you up to \$90 a quarter for your internet costs and provide students a laptop to use!**

## What does schooling in the RVA look like?

### Grades PreK-5: Getting Off to a Great Start While Learning to Love Education

At this stage in your child's education, your time and care is most needed. You will work directly with your student utilizing book based curriculum and/or online curriculum in core subjects with a dedicated teacher there to support and guide or your student can attend live daily classes led by an RVA teacher or a mixture of both. Students have a healthy mix of workbooks, lab activities and online tools, like learning games, to engage their interests.

### Grades 6-8: Becoming More Independent

In middle school, their electives open up to allow for growth at such an important time in their education. They will be either learning online, often with live teachers, from books, or a combination of those options. With your student beginning to get a more refined curriculum, the teachers also become more subject-specific. The student becomes acclimated to having multiple teachers throughout a day and the teachers pass on their passion for the individual subjects they teach.

### Grades 9-12: Advancing on their Path to a Limitless Future

By high school, we have prepared your student to strive for their heart's desire. While still participating in core subjects, the elective choices become wonderfully diverse with over 1000 courses to choose from. Your role at this stage is really focused on encouraging your student to set goals and to independently work towards achieving them. The classes are now mostly live online. They will begin planning for the career path they will take after high school. **They may also be taking AP and dual-credit courses, saving money while getting a jump-start on their future by earning college credits!**

### Special Education: We Believe ALL Children can Learn

It is our job to help your child find the right avenues and provide the needed supports for learning to occur. The RVA has a special education team who can evaluate students for suspected disabilities, re-evaluate students who have already been identified and provide support and resources for struggling students. Students with an IEP are paired with a special education teacher who assists the home educator in providing accommodations/modifications to the curriculum and selects a specific curriculum and interventions that target the student's area(s) of struggle. We also offer occupational therapy and speech and language therapy, if deemed needed as part of their IEP. The special education team works closely with the home mentor and associated therapists to ensure that the student's IEP is being followed and that the student is making appropriate progress with their education.

The RVA and Wittenberg-Birnamwood, the best of both worlds!

**Because of the unique partnership between the RVA and our district, you can take classes you can't take virtually, like choir and band, at your local school and then take the rest of your classes at home with the RVA!**

**You can even attend our graduation ceremony!**

**Do you like to play competitive local sports?**

**You can still join the local team while taking classes virtually with the RVA. That's something you can't do with any other virtual school!**
